PRESS RELEASE

Official launch of the S2A-Sport website

From Strategy to Actions: Supporting the professionalisation of sport organisations through the definition of work-based competences and the development of fit-for purpose training for Sport Administrators

Lyon, 27th April 2016: The S2A-Sport consortium made up of 12 partners and led by EOSE is pleased to announce the launch of its fully-featured website available at www.s2a-sport.eu.

For the first time in EOSE's history we have developed a fully responsive website for a EU funded project and we are delighted to introduce it to you. The new site has extensive content about the S2A-Sport project including a thorough description of the project aims and working methodology together with a Library area to search, have access and download all relevant and useful information and documents (reports, communication material and intellectual outputs).

Funded by the European Commission under Erasmus+, the S2A Sport will last 30 months starting from 01st September 2015 until 28th February 2018.

The S2A-Sport's website has been designed to assist visitors (e.g. individuals, Sport organisations, International/EU and National Sports Federations, Sports Ministries, training providers and vocational education providers, etc.) to find relevant information about the project and the innovative expected activities. Indeed, the S2A Sport project is based on the development of European industry-led Occupational Standards and relevant training material for "Sport Administrators"* with the end targeted goal to contribute to building the capacity and effectiveness of sport organisations across Europe.

The potential impact of the project is to encourage and support learning and employment mobility for the sport administrators and to put transparency into qualifications developed in different countries and sports in the context of fit-for purpose workforce development.

Through the project lifetime, **the S2A-Sport website will be regularly updated** to keep the visitors updated about the advancement of the work programme and latest news including specific focus on:

- 👉 **consultation phases** to help to define new standards, training and qualifications for people working in sport organisations in Europe who are responsible for managing and running sport.
- 👉 the **intellectual outputs** to be produced (final deliverables of the project).

###

*Sport Administration includes the processes and/or activities of running an organisation operating within the sport sector at local, regional, national and European levels. It includes skills and competencies that enable both paid staff and volunteers to coordinate, manage, market, organise and deliver sport in accordance with the purpose and direction of the organisation.
